

DIANA MAYALO

Nairobi | +254 799249060 | dianamayalo28@gmail.com | [Github](#) | [Portfolio](#) | [LinkedIn](#)

Junior Data Scientist

Experienced in data acquisition, modeling, statistical analysis, machine learning, and NLP. With a background in actuarial science, I offer strong skills in quantitative analysis and risk modeling. I am proficient in Python, SQL, Tableau, Power BI, and Excel, support data-driven decisions, streamline processes, and uncover insights. Skilled in team collaboration and project coordination, I contribute to innovation-focused teams across agriculture, finance, logistics, and technology by applying analytical thinking to improve performance and reduce uncertainty.

TECHNICAL SKILLS

Python • Object-Oriented Programming (OOP) • SQL • Sci-kit learn • NumPy • Pandas • Keras • TensorFlow • Matplotlib • Seaborn • Plotly • Power BI • Tableau • Excel • Git • GitHub • Jupyter Notebooks • Data Cleaning • Data Wrangling • Data Visualization • Machine Learning • Deep Learning • Natural Language Processing (NLP) • Exploratory Data Analysis (EDA) • Statistics • Regression Analysis • Classification • Clustering • Time Series Analysis • Model Evaluation and Tuning • Cloud Basics (AWS)

TECHNICAL PROJECTS

Nairobi Emergency Dashboard (NED)

A real-time, AI-powered emergency command center built for NADEMA that aggregates crowdsourced field updates and automates crisis summaries, accelerating disaster deployment and reducing response times across Nairobi County. [Streamlit, Python, Google Sheets API, Google Apps Script, Plotly Mapbox].

→ [Live Demo](#)

MAYA Tech

An innovative technology agency specializing in custom business automation, data-driven dashboards, and predictive intelligence solutions for scaling enterprises. [Python, Google Apps Script, n8n, Make, Google Sheets API, Looker Studio, Google Earth Engine, Gemini/GPT APIs].

→ [Live Demo](#)

CleanWater AI

Developed an end-to-end machine learning system integrating WPDx, GEMS, and Google Earth Engine satellite data to monitor water quality and predict contamination risks across 22,000+ water points in Kenya [Python, XGBoost, NLP, Streamlit, Google Earth Engine API, Docker].

→ [Live Demo](#)

→ [Github](#)

Crop Disease Classification with CNN

Built and deployed a custom convolutional neural network using TensorFlow/Keras to classify 15 types of healthy and diseased crop leaves from the PlantVillage dataset, achieving 94% test accuracy with data augmentation and a Streamlit web deployment [Python, TensorFlow/Keras, CNN, Computer Vision, Streamlit, Scikit-learn].

EXPERIENCE

Data Analyst Intern, **Future Interns**, Bengaluru, India

Sep 2024 - Nov 2024

- Analyzed the Titanic dataset to uncover survival patterns, supporting predictive model development.
- Built a loan eligibility model in Python with 81.3% accuracy, showcasing strong ML proficiency.
- Designed Power BI dashboards for IPL data, translating player metrics into actionable insights.

Data Analyst (Freelance), **Intelinkpro**, Remote

Oct 2023 – Apr 2025

- Delivered tailored insights through advanced data analysis, improving client outcomes by up to 15%.
- Automated Excel workflows, reducing reporting time by 30% and increasing accuracy.
- Built interactive Power BI dashboards to visualize key metrics and support fast decision-making.

EDUCATION

Moringa School, Nairobi, Kenya
Data Science Bootcamp

Feb 2025 - Aug 2025

Jomo Kenyatta University of Agriculture and Technology, Nairobi, Kenya
Bachelor of Science in Actuarial Science

Sep 2019-June 2024
